Static Splints with Dynamic Properties and Technologies that Provide Therapeutic Positioning and Aid in the Management and Rehabilitation of Contractures

**Prevent:** Long-term complications, further injury to joints and surrounding tissue, and complications resulting from poor alignment and restricted movement

**Protect:** Skin from excessive pressure and shearing

**Restore:** Lost range of motion and function

Restorative Medical has one of the most extensive varieties of sizes available for each product line and can custom make all products specific to your patient’s needs.

20730
RM VertabrEase TLSO
L-Code L0456/L0457

Improves posture for patients suffering from kyphosis, lordosis, scoliosis and other spinal deformities. Padded shoulder straps encourage upright posture.

• High-temperature plastic inside the back panel.
• Enclosed plastic inserts can be added to the front and sides and removed, as needed, to support the body’s core and back.
• Padded shoulder straps comfortably enhance posture, helping lung expansion (e.g., kyphotic patients).
• Apron front with sewn-in plastic creates comfortable torso compression.
• Breathable, comfortable padding allows prolonged use.
• Elastic belts comfortably support the spine.
• Optional attachments for head/neck posture correction are available.

Choose a back height and a circumference (ex: TLSO Short Slim).

*Choose the greater of the two circumference measurements when using the measuring guide.
*For all available sizes please consult our product guide or website.
BACK & NECK

20729
RM VertabrEase LSO
L-Code L0631/L0648

Helps to immobilize and support the lumbar spine for soft tissue injuries and relief of low back pain. Shown with optional shoulder straps. Available with pendulous abdomen front.

- Elastic circumference belts provide comfortable support and self-adjustment.
- High-temperature plastic inside the back panel can be remolded by your health professional to custom fit and provide support to the lumbar region.
- High-temperature plastic inserts can be added to the front (and removed as needed) to support the body’s core.
- Breathable, comfortable padding helps to keep the skin cool and dry, allowing prolonged use.
- Optional padded shoulder straps can be ordered with the LSO.

20728
NeuroFlex® Restorative Safe Spine
L-Code L0454/L0455

Comfortable spine support for conditions like kyphosis, scoliosis, lordosis. Padded shoulder straps encourage upright posture.

- Padded shoulder straps comfortably enhance posture, including that of kyphotic patients, thereby helping lung expansion.
- Apron front with sewn-in plastic creates comfortable torso compression.
- Elastic belts comfortably support the spine.
- Breathable, comfortable padding allows prolonged use.
- High-temperature plastic inside the back panel.
- Optional attachments for head/neck posture correction are available.
20735 - NeuroFlex® Restorative Kentucky Kollar
L-Code: L0113
Addresses dystonia, torticollis and wry neck conditions.

Features:
- Adjustable strap at neck seats and secures the collar on the shoulder.
- Pad under the arm provides comfort and redistributes skin pressure.
- High-temperature plastic can be remolded by your health professional to provide the best fit as the patient improves.
- Flex Technology applies flexible low-load passive stretch (LLPS) to encourage the muscle to relax and improve the head posture.
- Optional forehead strap available for all sizes.

20728H - NeuroFlex® Restorative Cervical HyperExtension Stop
L-Code: L0999
Fits into our TLSO and addresses neck hyper extension, head leaning.

Features:
- Padded hyperextension roll holds the head comfortably.
- Wide platform securely holds the hyperextension roll.
- Flex Technology vertical slat is flexible to gradually bring the neck to the vertical position.
- High-temperature plastic can be remolded by your health professional to position the patient’s head forward gradually.
**BACK & NECK**

---

**20728SCL/R - NeuroFlex® Restorative Safe Cerv, Left or Right**

**L-Code: L0999**

Fits into our TLSO and addresses left or right head leaning with or without forward leaning.

**Features:**
- High-temperature headpiece and vertical slat can be remolded by your health professional to provide the best fit.
- Wide forehead strap holds the head comfortably.
- Adjustable-position headpiece on the vertical slat provides gradual lifting of the head from side leaning.
- Padded mandibular support provides comfort and redistributes skin pressure.
- Flex Technology vertical slat is flexible to gradually bring the neck toward the upright position.

---

**20728C - NeuroFlex® Restorative Cervical Extension, Forward**

**L-Code: L0999**

Fits into our TLSO and addresses forward head upper body posture.

**Features:**
- High-temperature plastic headpiece and vertical slat can be remolded by your health professional to provide the best fit.
- Padded headpiece is attached to the vertical slat.
- Wide forehead strap holds the head comfortably.
- Flex Technology vertical slat is flexible to gradually bring the neck back toward the upright position.

Restorative Medical

332 East Broadway
Brandenburg, KY 40108 - USA
Tel: +1-270-422-5454
Website: restorativemedical.com
**20736 - RM Restorative Hand**

**L-Code: L3807/L3809**

Comfortably addresses wrist/hand/finger lost range and tension.

**Features:**
- High-temperature plastic base can be remolded by health professional to continue restorative process as the patient improves.
- Lightweight support for painful extremities.
- Plastic base extends under the thumb gradually abducting it comfortably.
- Flex Technology splint moves with the patient’s abnormal muscle tone and spasticity for comfort, and helps to relax the tone.
- Padding provides comfort and redistributes skin pressure.
- Color coding aids proper strap attachment.
- Comfortable thumb support for mild lost range.
- Thermal adaptive technology for optimal comfort.

---

**20737 - NeuroFlex® Restorative ThumbEase**

**L-Code: L3807/L3809**

For severely adducted thumbs and thenar eminence collapse.

**Features:**
- Wrist strap placement efficiently addresses wrist drop.
- Wide strap conforms over the fingers and the back of the hand comfortably.
- Thumb pocket without rigid base allows for use on severely contracted thumbs.
- Lightweight support for painful extremities.
- Flex Technology splint moves with the patient’s abnormal muscle tone and spasticity for comfort, and helps to relax the tone.
- Padding provides comfort and redistributes skin pressure.
- Padding can be added for gradual abduction of severely contracted thumbs.
- High-temperature plastic base can be remolded by your health care professional to continue the restorative process as the patient improves.
- Thermal adaptive technology for optimal comfort.

*For all available sizes please consult our product guide or our website.
20721 - Neuroflex® Restorative Flex Hand
L-Code: L3807/L3809
Addresses tightest closed fist to moderate finger extension with graduated size cones, reverse cones or cylinders.

Features:
- Includes sized cones that allow a gradual increase of the hand/finger’s range of motion. Reverse cones and cylinders (rolls) are available upon request.
- Thin palmar bar fits into the most tightly closed, fisted hand.
- Padding provides comfort and redistributes skin pressure, increasing the likelihood of patient compliance.
- Flex Technology splint moves with the patient’s abnormal muscle tone and spasticity for comfort, and helps to relax the tone.
- High-temperature plastic base can be remolded by your health professional to continue the restorative process as the patient improves.

20739 - RM Cock-Up Wrist Splint
30-degree wrist cock-up. Provides moderate, comfortable support of hand and wrist, post injury or surgery.

Features:
- Splint provides the wrist with cock-up position (~30° hyperextension) and free movement for the thumb and fingers during activities of daily living.
- High-temperature plastic base can be remolded as needed by your health professional.
- Soft strap protects the thumb web space and secures the hand in the splint.
- Wide, soft wrist strap holds the wrist at the cock-up position.
- Thermal adaptive technology for optimal comfort.
- Wide straps provide comfort even during sleep, increasing likelihood of patient compliance.

20379Roll - RM Cock-Up Hand Splint with Finger Extension Roll
L-Code: L3807/L3809
30-degree wrist cock-up with removable large roll when finger extension is desired.

Features:
- Splint provides the wrist with cock-up position (~30° hyperextension) and free movement for the thumb and fingers during activities of daily living.
- Finger extension roll can be added to provide stretching when desired (e.g. during sleep).
- High-temperature plastic base can be remolded as needed by your health professional.
- Thermal adaptive technology for optimal comfort.
- Wide straps provide comfort, increasing likelihood of patient compliance.
**20715 - RM BendEase Hand - Sized**  
**L-Code: L3807/L3809**  
Bend-by-hand moldable aluminum base, used for moderate lost range.  
**Features:**  
- Foam over aluminum base can be remolded by your health professional to continue the restorative process.  
- Lightweight support for painful extremities.  
- Base extends under the thumb gradually abducting it comfortably.  
- Padding provides comfort and redistributes skin pressure.  
- Color coding aids proper strap attachment.  
- Comfortable thumb support for mild lost range.  
- Thermal adaptive technology for optimal comfort.

**20715 - RM BendEase Hand - Universal**  
**L-Code: L3807/L3809**  
Moldable aluminum base, used for moderate lost range (universal size fits most adults).  
**Features:**  
- One size fits most hands.  
- Foam over aluminum base can be remolded by your health professional to continue the restorative process.  
- Lightweight support for painful extremities.  
- Padding provides comfort and redistributes skin pressure.  
- Additional padding in the thumb pocket (included) allows gradual abduction of severely contracted thumbs.  
- Wide, contoured wrist strap conforms over and stays on the wrist.  
- Color coding aids proper strap attachment.  
- Thermal adaptive technology for optimal comfort.
**20732 - Prosperity Hand**

**L-Code: L3807/L3809**
Slit between the 3rd & 4th digits to allow for varying degrees of range of motion of fingers.

**Features:**
- Padding provides comfort and redistributes skin pressure.
- High-temperature plastic base can be remolded by your health professional to continue restorative process as the patient improves.
- Slit between the middle and ring fingers fits many lost-range conditions with little or no remolding.
- Thermal adaptive technology for optimal comfort.
- Lightweight support for painful extremities.
- Plastic base extends under the thumb gradually abducting it comfortably.
- Flex Technology splint moves with the patient’s abnormal muscle tone and spasticity for comfort and helps to relax the abnormal muscle tone.
- Color coding aids proper strap attachment.

## ACCESSORIES

**20736D - Dorsal Interphalangeal Flexion Assist**

**20736I - Infinity Dorsal Attachment**

**20737UD - Ulnar Drift Finger Separators**

**20737UDstraps - Ulnar Drift Straps**
20740 - NeuroFlex® Restorative ThumbEase
L-Code: L3807/L3809
For severely adducted thumbs and thenar eminence collapse.
Features:
• Wrist strap placement efficiently addresses wrist drop.
• Wide strap conforms over the fingers and the back of the hand comfortably.
• Thumb pocket without rigid base allows for use on severely contracted thumbs.
• Padding can be added for gradual abduction of contracted thumbs.
• Lightweight support for painful extremities.
• Flex Technology splint moves with the patient’s abnormal muscle tone and spasticity for comfort, and helps to relax the tone.
• High-temperature plastic base can be remolded by your health professional to continue restorative process as patient improves.
• Padding provides comfort and reduces skin pressure.
• Color coding aids proper strap attachment.
• Thermal adaptive technology for optimal comfort.

20717 - RM HyperHand
L-Code: L3807/L3809
Provides moderate, comfortable support of the hand and wrist, post injury or surgery.
Features:
• Flex Technology splint moves with the patient’s abnormal muscle tone and spasticity for comfort, and helps to relax the tone.
• Plastic base extends to the tip of the thumb to provide support, and slits between the fingers provide individualized flex.
• High-temperature plastic base can be remolded by your health professional to continue restorative process as patient improves.
• Padding provides comfort and reduces skin pressure.
• Color coding aids proper strap attachment.
• Thermal adaptive technology for optimal comfort.

HyperHand uses different materials for strapping based on product size. Infant size shown above.

* For all available sizes please consult our product guide or website.
20720 - NeuroFlex® Restorative Flex Hand
L-Code: L3807/L3809
Addresses tightest closed fist to moderate finger extension with graduated size cones, reverse cones or cylinder.

Features:
• Includes sized cones that allow a gradual increase of the hand/finger’s range of motion. Reverse cones and cylinders (rolls) are available upon request.
• Thin palmar bar fits into the most tightly closed, fisted hand.
• Padding provides comfort and redistributes skin pressure, increasing the likelihood of patient compliance.
• Flex Technology splint moves with the patient’s abnormal muscle tone and spasticity for comfort, and helps to relax the tone.
• High-temperature plastic base can be remolded by your health professional to continue the restorative process as the patient improves.

20746 - Safe Boot
L-Code: L4396/4397
Helps maintain neutral alignment of the foot and to relieve pressure on the heel.

Features:
• Flex Technology splint moves with the patient’s abnormal muscle tone and spasticity for comfort and helps to relax the tone.
• High-temperature plastic base can be remolded by your health professional to continue the restorative process as the patient improves.
• Anti-rotation bar (on sizes 5”, 6”, 7” and 8”) prevents rolling of the patient’s leg and controls internal or external rotation.
• Non-slip sole allows short standing and walking.
• Dorsiflexion assist (flex) straps (on sizes 6”, 7”, and 8”) aid in proper alignment of the foot and adjustable tension helps to control plantar flexion.
• Padding provides comfort and redistributes skin pressure.
20725 - NeuroFlex® Restorative Knee

L-Code: L1831
Addresses mild to severe flexion contractures, including those with below knee amputations (BKA).

**Features:**
- Padding provides comfort and reduces skin pressure.
- High-temperature plastic cuffs can be remolded by your health professional to custom fit the patient’s upper and lower legs.
- Adjustable dials allow gradual changes to move the joint toward normal alignment.
- Brace provides 3-point leverage similar to manual stretching, improving range of motion
- Flex Technology splint moves with the patient’s abnormal muscle tone/spasticity.

20730 - VertebrEase TLSO

L-Code: L0456
Improves posture for patients suffering from kyphosis, lordosis, scoliosis and other spinal deformities. Padded shoulder straps encourage upright posture.

**Features:**
- High-temperature plastic inside the back panel.
- Enclosed plastic inserts can be added to the front and removed, as needed, to support the body’s core and back.
- Padded shoulder straps comfortably enhance posture, helping lung expansion (e.g., kyphotic patients).
- Apron front with sewn-in plastic creates comfortable torso compression.
- Breathable, comfortable padding allows prolonged use.
- Elastic belts comfortably support the spine.
- Optional attachments for head/neck posture correction are available.

20735 - NeuroFlex® Restorative Kentucky Kollar

L-Code: L0113
Addresses dystonia, torticollis and wry neck conditions.

**Features:**
- Adjustable strap at neck seats and secures the collar on the shoulder.
- Pad under the arm provides comfort and redistributes skin pressure.
- High-temperature plastic can be remolded by your health professional to provide the best fit as the patient improves.
- Flex Technology applies flexible low-load passive stretch (LLPS) to encourage the muscle to relax and improve the head posture.
- Optional forehead strap available for all sizes.
20724 - Neuroflex® Restorative Flex Elbow

L-Code: L3760
Addresses mild to severe flexion contractures, including those with below elbow amputations (BEA).

Features:
- Adjustable dials allow gradual changes to move joint toward normal alignment.
- High-temperature plastic cuffs can be remolded by your health professional to custom fit patient’s upper and lower arms.
- Flex Technology splint moves with the patient’s abnormal muscle tone/spasticity.
- Padding provides comfort and redistributes skin pressure.
- Brace provides 3-point leverage similar to manual stretching, improving range of motion.
- Lower cuff swivels to allow for varying degrees of flexion.

20724air - RestAir Elbow

Suggested L-Code: L3760
Addresses elbow flexion contractures with air technology.

Features:
- RestAir technology uses an air bladder at the inside of the elbow, positioned parallel to the arm to redistribute skin pressure.
- Bilateral hinged uprights work with the air bladders to continue to move the joint toward normal alignment.
- Hinges can be removed for the most severe flexion and added as the range improves.
- Flex Technology splint moves with the patient’s abnormal muscle tone and spasticity.
- Soft, breathable fabric helps keep the patient’s arm cool and dry.
- Superior padding provides comfort, increasing likelihood of patient compliance.
- Hand-bulb air pump (included).

20755air - RestAir Knee
L-Code: L1831 or L1847
Addresses knee flexion contractures with air technology.
Features:
• RestAir technology uses 2 air bladders at the back of the leg to redistribute skin pressure.
• Bilateral hinged uprights work with the air bladders to continue to move the joint toward normal alignment.
• Hinges can be removed for the most severe flexion contracture and added as the range improves.
• Soft, breathable fabric helps keep the patient’s leg cool and dry.
• Superior padding provides comfort, increasing likelihood of patient compliance.
• Hand-bulb air pump included.

*SUN TAFO - Flo-Form™ Fluidized Boot*

L-Code: L4396/4397

Helps to maintain neutral alignment of the foot and to relieve pressure on the heel using fluidized technology.

**Features:**
- Stabilizer bar effectively prevents rolling of the patient’s leg and controls internal or external rotation.
- Flo-Form™ fluidized medium in calf area, top of foot, and talus strap helps provide even pressure distribution in points of orthotic contact.
- Dorsiflexion assist (flex) straps attach through a D-ring aiding in proper alignment of the foot. Adjustable tensioning to help control plantar flexion.
- Protective Flo-Form™ fluidized talus strap allows for visual examination of the heel. Design allows for optimal heel floatation.
- Thermal adaptive technology for optimal comfort.
- Non-slip sole allows short standing and walking.

*For all available sizes please consult our website: www.restorativemedical.com*

- Non-slip sole allows short standing and walking.
20742 - NeuroFlex® Restorative FootEase
L-Code: L4396/4397
Addresses mild to moderate plantar flexion contractures, extensor tone and plantar fasciitis.

Features:
• Anti-rotation bar prevents rolling of the patient’s leg and can be stored inside the padding if not needed.
• Dorsiflexion assist (flex) straps aid in the proper alignment of the foot and adjustable tension helps to control plantar flexion.
• High-temperature plastic base can be molded by your healthcare professional to address moderate to severe lost range, then can be remolded to continue the restorative process as the patient improves.
• Non-slip sole allows brief standing and walking.
• Padding provides comfort and redistributes skin pressure.
• Open heel allows full floatation, reducing risks of pressure ulcers.
• Flex Technology splint moves with the patient’s abnormal muscle tone and spasticity for comfort and helps to relax the tone.

20744I - RM Safe Boot I
L-Code: L4398
Addresses flaccid foot drop and suspends the heel.

20744II - RM Safe Boot II
L-Code: L4396/L4397
Addresses plantar flexion, flaccid foot drop, plantar fasciitis and mild abnormal muscle tone.

Features:
• Flex Technology splint moves with the patient’s abnormal muscle tone and spasticity for comfort and helps to relax the abnormal muscle tone.
• High-temperature plastic base can be remolded by your health professional to continue the restorative process as the patient improves.
• Anti-rotation bar prevents rolling of the patient’s leg and can be stored inside the padding if not needed.
• Non-slip sole allows brief standing and walking.
• Padding provides comfort and reduces skin pressure.
• Dorsiflexion assist (flex) straps (available only on Safe Boot II) aid in proper alignment of the foot and adjustable tension helps to control plantar flexion.
• Open heel allows full floatation, reducing risks of pressure ulcers.
• Toe support has “toe off” angle to assist in gait training and short ambulation.

Universal-sized RM Safe Boot I and II
• Removable toe plate can be adjusted to accommodate different foot lengths and has “toe off” angle to assist in gait training and short ambulation.
EZ Stride Posterior Carbon Fiber AFO  
**L-Code: L1951**  
Helps maintain neutral alignment of the foot.  
**Features:**  
• True spiral design.  
• Lateral strut spirals to medial aspect.  
• Continuous strand design.  
• Dynamic footplate.  
• Super flexible calf band accommodates a wide range of circumferences.  
• Structurally reinforced in high stress areas.

EZ Stride Anterior Carbon Fiber AFO  
**L-Code: L1932**  
Helps maintain neutral alignment of the foot.  
**Features:**  
• Lateral strut spirals to the front, providing support for patients who pronate (valgus or eversion).  
• One-piece design with “Y” front trim line provides relief to the tibia’s tuberosity area.  
• Flexible calf strap accommodates a wide range of leg sizes.  
• Structurally reinforced in high-stress areas.  
• Optional soft interface kit available (suggested L-code: L2820).

**20760air - RestAir Hip**  
**L-Code: L1652**  
Comfortably and safely treats hip adduction & scissoring.  
**Features:**  
- RestAir technology uses 4 air bladders (2 on each side) to redistribute skin pressure and gradually increase the hip’s range of motion.  
- Wide cuff straps provide comfort, increasing likelihood of patient compliance.  
- Spreader Bar Assembly with 3 choices of abductor-bar length provides greater hip abduction when needed.  
- Flex Technology orthosis moves with the patient’s abnormal muscle tone and spasticity for comfort and helps to relax the tone.  
- Hand-bulb air pump (included).

Web:  www.restorativemedical.com
Phone:  1.800.793.5544
Fax:  1.270.422.5453
Orders:

• Orders are shipped FedEx or UPS ground unless other method is indicated.
• All shipping charges will be added to the invoice amount.
• Orders received after 2PM Eastern time may be shipped the following day. Excludes custom or back ordered products.
• FedEx and UPS tracking available upon request.
• Drop shipping available at no additional cost.
• Volume purchase discounts available.

Terms of Sale:

NET 30 days from the date of invoice. Orders may be held if account is delinquent.

Payment:

Cash, money order or credit card (MasterCard, Visa, or Discover)

Because of the complexity of our patients we always recommend trained “Restorative” fitters, clinicians or orthotists fitting our devices. People who fit Restorative devices understand the basics of abnormal muscle tone, spasticity, and shortened tissue, and how to safely and comfortably treat those conditions.

These devices are designed to be heat molded or adjusted in some other fashion, if needed, to fit patients whose body parts are very commonly pulled into deformities due to some sort of damage to their central nervous system. Custom fitting and refitting as patients improve protects them from skin integrity issues, while continuing their bodies toward correction.
